

# Jazz Technical Services

**Jazz Technical Services (JTS)** is a maintenance, repair and overhaul (MRO) service provider, fully equipped and trained to complete all levels of heavy checks and MRO services for MHIRJ (formerly Bombardier), De Havilland, and select Embraer regional aircraft. JTS is based in Halifax, Nova Scotia and employs 400 maintenance professionals in an 80,000 square foot facility with six bays available. JTS is authorized to repair Canadian, US and EASA aircraft.

## JTS Offers:

- Competitive rates
- Proven track record
- Industry-leading turn times, resulting in reduced out-of-service time
- Increased reliability

## In-house Capabilities

- Structures
- In-service engineering
- Planning
- Production control
- Supply management
- Our own Approved Engineering Organization (AEO)

# AIRFRAME HEAVY MAINTENANCE

## Count on our Experience

Jazz Aviation is the only operator in the world of all four De Havilland commercial regional platforms and the largest operator of Dash 8 100 / 200 / 300 aircraft in the world; providing extensive experience and expertise to the Jazz Technical Services division.

Having operated the Dash 8 100 / 200 / 300 aircraft for over 30 years, JTS has completed more C and D checks than any other airline. Our industry leading turn times, competitive labour rates and award winning quality service ensures minimum aircraft downtime and improved operational reliability.

## Capabilities

JTS is fully equipped and trained to complete all levels of heavy checks and MRO services for:

- CRJ100, CRJ200
- CRJ700, CRJ900 and CRJ1000
- Dash 8 100, 200, 300
- Dash 8-400
- EMB135, EMB145

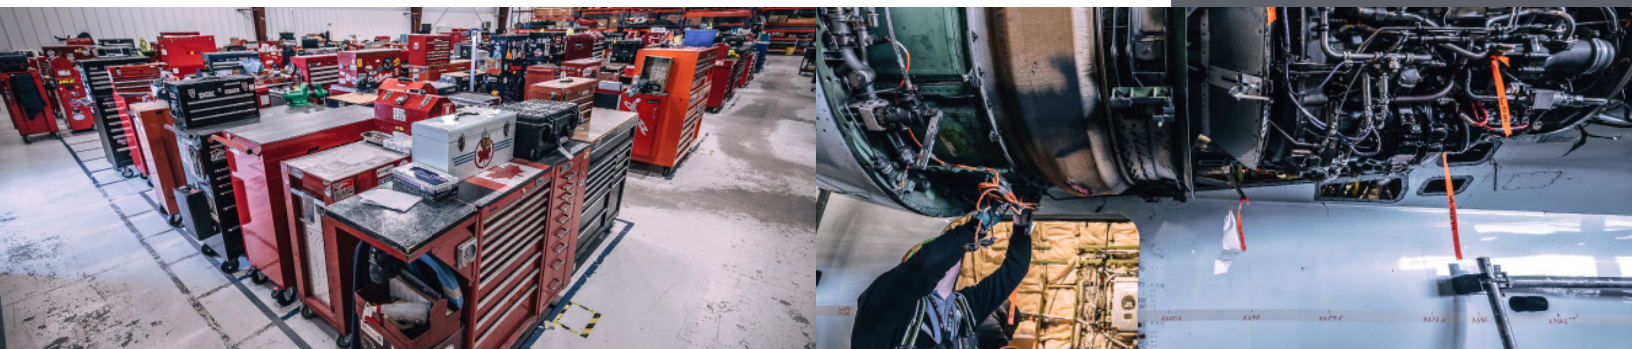

## MHIRJ and De Havilland Authorized Service Facility

JTS has been an Authorized Service Facility (ASF) since June 2017 and is the only ASF in the world to offer service on all four De Havilland commercial regional aircraft platforms

DE HAVILLAND AIRCRAFT  
OF CANADA LIMITED

Authorized Service Facility

## *DASH 8-300 EXTENDED SERVICE PROGRAM (ESP)*

JTS is the only MRO to have completed the Dash 8-300 Extended Service Program (ESP) extending the service life of Jazz's Dash 8-300 aircraft by 50 per cent, or approximately 15 years, through the replacement or upgrade of required structural and systems components.

## *INTERIOR RECONFIGURATION*

- LOPA changes
- Oven installations
- Galley upgrades
- Dual cabin reconfigurations
- Storage bin and wardrobe installation

## *IFE AND WI-FI INSTALLATION*

**Take your service level to new heights**

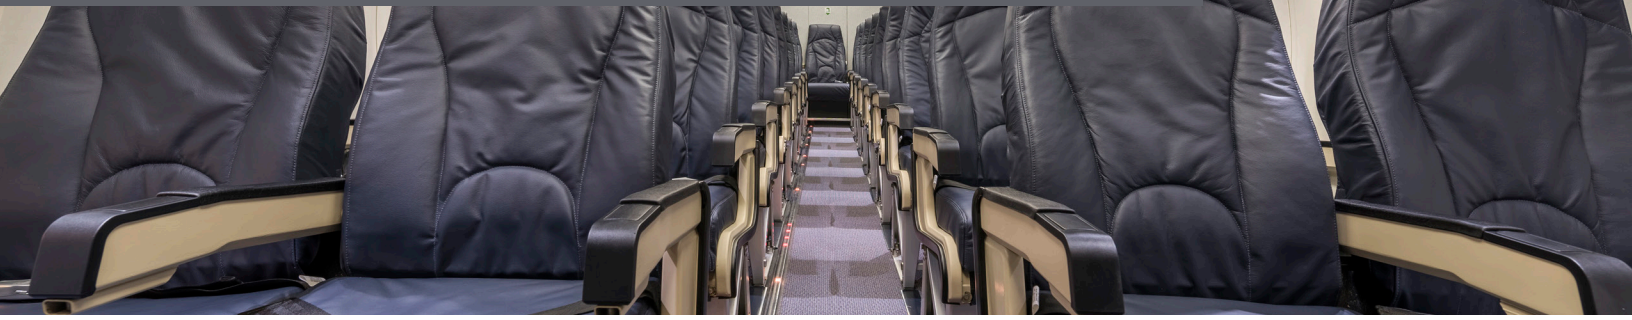

JTS's avionics professionals are experienced with all onboard electronics and able to manage your special project; whether you need installation expertise on your in-flight entertainment system or help meeting the demands of today's tech-savvy passenger with onboard Wi-Fi access.

JTS is an experienced installer of Gogo Wi-Fi systems.

# *INTERIOR REFURBISHING*

## **Enhance your customer experience**

**Spotless is the new black!** Old becomes new again with the attention and expertise of JTS's refurbishment professionals. Our services portfolio includes an HVA machine that reduces cabin panel refinishing times.

## **Cost effective solution**

- Re-skinned sidewall and ceiling panels
- LED lighting upgrade
- New seat covers
- New carpeting
- Refreshed galley
- Renewed lavatory facility

## *LEASE RETURNS*

End of lease expertise including:

- Lease return condition analysis
- Borescope inspections
- Aircraft records audits
- Preparation for short-term storage
- Return to service checks
